

# Project Justification

After you complete the graphic organizer below, use this project justification document to explain how you used computational thinking in your project.

**Problem Identification.** For each iteration of your problem, please explain how you arrived at your identified problem.

**Decomposition.** For each iteration where you decomposed an identified problem, please explain how this decomposition helped you solve your identified problem.

**Pattern Recognition.** For each iteration where you recognized patterns in data, please explain how these patterns helped you solve your identified problem.

**Abstraction.** For each iteration where you abstracted information, please explain how abstraction allowed you to solve your identified problem.

# Iteration 1

Problem Identification

To set up your  
identified problem

Decomposition (How would you break down your problem into sub-problems?)

Pattern Recognition (Are there related solutions to draw on?)

Abstraction (How would you abstract this problem?)

## Graphic Organizer

# Iteration 2

Problem Identification

To set up your  
identified problem

Decomposition (How would you break down your problem into sub-problems?)

Pattern Recognition (Are there related solutions to draw on?)

Abstraction (How would you abstract this problem?)

## Graphic Organizer

# Iteration 3

To set up your  
identified problem

A dotted line with an arrowhead points from the right side of the "Problem Identification" box to the text "To set up your identified problem".

Decomposition (How would you break down your problem into sub-problems?)

A light blue rounded rectangle with a dark blue border. The text is centered at the top of the box.

Pattern Recognition (Are there related solutions to draw on?)

A light blue rounded rectangle with a dark blue border. The text is centered at the top of the box.

Abstraction (How would you abstract this problem?)

A light blue rounded rectangle with a dark blue border. The text is centered at the top of the box.

## Graphic Organizer

# Iteration 4

Problem Identification

To set up your  
identified problem

Decomposition (How would you break down your problem into sub-problems?)

Pattern Recognition (Are there related solutions to draw on?)

Abstraction (How would you abstract this problem?)

## Graphic Organizer

# Iteration 5

To set up your  
identified problem

Two dotted arrows originate from the right side of the "Problem Identification" box. One arrow points to the "Decomposition" box, and the other points to the "Abstraction" box. The text "To set up your identified problem" is positioned between these two arrows.

Decomposition (How would you break down your problem into sub-problems?)

A light blue rounded rectangle containing this text.

Pattern Recognition (Are there related solutions to draw on?)

A light blue rounded rectangle containing this text.

Abstraction (How would you abstract this problem?)

A light blue rounded rectangle containing this text.

## Graphic Organizer

# Iteration 6

Problem Identification

To set up your  
identified problem

Decomposition (How would you break down your problem into sub-problems?)

Pattern Recognition (Are there related solutions to draw on?)

Abstraction (How would you abstract this problem?)

## Graphic Organizer

# Iteration 7

To set up your  
identified problem

Decomposition (How would you break down your problem into sub-problems?)

Pattern Recognition (Are there related solutions to draw on?)

Abstraction (How would you abstract this problem?)

## Graphic Organizer

# Iteration 8

Problem Identification

To set up your  
identified problem

Decomposition (How would you break down your problem into sub-problems?)

Pattern Recognition (Are there related solutions to draw on?)

Abstraction (How would you abstract this problem?)

## Graphic Organizer

# Iteration 9

To set up your  
identified problem

Decomposition (How would you break down your problem into sub-problems?)

Pattern Recognition (Are there related solutions to draw on?)

Abstraction (How would you abstract this problem?)

## Graphic Organizer

# Iteration 10

To set up your  
identified problem

Decomposition (How would you break down your problem into sub-problems?)

Pattern Recognition (Are there related solutions to draw on?)

Abstraction (How would you abstract this problem?)

## Graphic Organizer
